PROFILE SUMMARY

I am a 4th-year Electronics Engineering student (Computer Engineering specialization) at King Mongkut's University of Technology North Bangkok. Over the past few years I've enjoyed building software, but lately I've found myself more curious about the security side of things. I like thinking about how systems fail, not just how they're built. I'm looking for an internship where I can start learning that properly, alongside people who already know the field.

EDUCATION

King Mongkut's University of Technology North Bangkok

2023 - Present

Bachelor of Engineering Technology (Electronics Engineering Technology - Computer) (GPAX: 2.97)

College of Industrial Technology

- Relevant Coursework: Cybersecurity, Computer Network Systems & Data Communication, Operating System, Linux Operating Systems & Administration, Web Application Development, Database & Data Technology

Marialai School

2021 -2023

Science-Mathematics Program (GPAX: 3.86)

UNIVERSITY PROJECTS

Automated Tax Invoice Data Extraction (Senior Thesis - 2 person Team) | Python, OCR, AI Vision Models

IN PROGRESS

- Building an OCR pipeline that runs on-premise and pulls structured data out of Thai tax invoices
- Testing a few different vision-language models, including Qwen2.5-VL and Typhoon-OCR, to see which handles Thai text more accurately
- Working out a JSON schema that can deal with messy layouts, like when quantity and price get jammed into the same field as the item description

Sports Court Booking Web Application (Team Project, 6 members) | Next.js, Firebase/Firestore, TypeScript

APR 2026

- Designed a 3-tier architecture (frontend, API layer, database) using an Incremental Process Model
- Implemented PIN-based authentication to restrict staff admin access and prevent unauthorized entry to the dashboard
- Used Firestore's runTransaction to stop two people from booking the same court at the same time
- Wrote unit and integration tests with Jest and React Testing Library, covering both the Staff Dashboard and Customer Booking Page

PARTICIPATION IN ACADEMIC ACTIVITIES / ACHIEVEMENTS

Tokio Marine API Workshop

MAR 2026

- Attended a workshop on API design and integration, gaining exposure to how enterprise systems handle data exchange between services

KEY SKILLS

Programming & Development: Python, JavaScript, HTML/CSS, SQL

Tools & Platforms: Linux, Microsoft Office, Canva

Languages: Thai (Native), English (Intermediate)

Core Competencies: Punctuality, Problem-Solving, Attention to Detail, Teamwork, Communication
